

TAUPO CLIFFHANGER

New Zealand's extreme swing opened in December 2009, and has since had over 15,000 brave souls freefall on this epic experience.

This adrenalin rush adds another dimension to the plethora of adventure activities in the Lake Taupo region. It offers those who are challenged by the idea of hanging upside down, a feet-first mind-blowing rush.

The swing itself, is operated from a platform, 44 metres above the Waikato River. For those that take on the extreme swing, our crew will get them signed up and weighed, then it's off to the platform for a full body harnessing. Once the harness is connected, its action time! Swingers can choose a countdown or the surprise option, either way the release cord is pulled and the freefall kicks in.

Swinging right down towards the crystal clear waters below, then arcing up to nearly 180°, the experience will reach speeds of up to 70kph. As the swinging slows, one can finally enjoy the scenery as the winch takes care of the ride back to the platform. Swingers can choose whether to go solo or tandem.
